

I hope you folks can find more important things to concern yourselves with than to try to mess up the best thing ever in radio. As a driver I can find out the weather and traffic problems before arriving at many cities and adjust my routing accordingly.

Broadcast radio can never do this because they must spend too much time selling product. Being able to get this information immediately and at any time is just too sweet! DON'T MESS WITH IT. Thank from a family of ten voters and 8 (eight) satellite receivers. Larry Hartman
